

# EV Charger Mounting Post

## Product Information

A high quality, electrical vehicle charger post for domestic, workplace, semipublic and public EV charging installations. The post has a mounting flange for direct fitting to concrete or the GYRO-EV Make Ready Termination Pit. Excellent when you need a charging station positioned away from an external wall. Designed and manufactured specifically for a huge range of chargers available in New Zealand.

### Standard Features

- Can accommodate any EV charger model on the market
- Cable hole & mounting plates designed to fit perfectly with the charger
- Available in both round and square options, with your choice of stainless steel or powder coated finish
- Single & Dual mounting options available
- Supplied with all required fasteners to fit the charger to the mounting post
- The post has a mounting flange for direct fitting to concrete or the GYRO-EV Make Ready Termination Pit (optional extra)
- Height: ~1200 mm
